

TEST REPORT

Report Ref.:	LEI17103354A Original		
Date Received:	18/10/2017	Date Issued:	20/10/2017

Company Name & Address:	Fashion Formula Ltd Drakeglen House, 35-36 Disraeli Rd London, NW10 7AX GBR
Contact Name:	Alexander Wills

Sample Description:	Stretch Jersey
Ref / Style Number:	Geo Elephant
Colour:	Printed
Supplier:	Fashion Formula
Quoted Fibre Composition:	96% PE 4% EL
Retailer:	General

Test	Method	Sample	Result
Free Formaldehyde	BS EN ISO 14184-1:2011	Elephant Print Knit	No Requirement

Tests marked (^) in this report have been performed by an approved 3rd party laboratory.
Tests marked (*) in this report are not included in our UKAS scope of accreditation.

Free Formaldehyde BS EN ISO 14184-1:2011
Sample: Elephant Print Knit

Test	Method
Determination of Formaldehyde	BS EN ISO 14184-1:2011
Sample mass (g)	Formaldehyde (ppm)
2.5020	ND
2.5007	ND
Average Formaldehyde Concentration:	ND
Range of Calibration: 0.15 - 11.25 µg/ml	
The sample was received:	Unsealed
Comments: ND = Not Detected (<16ppm)	

Overall Test Result: No Requirement
Uncertainty: ±6%

This report is made solely on the basis of your instructions and/or information and materials supplied by you. It is not intended to be a recommendation for any particular course of action. Intertek does not accept a duty of care or any other responsibility to any person other than the Client in respect of this report and only accepts liability to the Client insofar as is expressly contained in the terms and conditions governing Intertek's provision of services to you. Intertek makes no warranties or representations either express or implied with respect to this report save as provided for in those terms and conditions. We have aimed to conduct the Review on a diligent and careful basis and we do not accept any liability to you for any loss arising out of or in connection with this report, in contract, tort, by statute or otherwise, except in the event of our gross negligence or willful misconduct.

The reported expanded uncertainty is based on a standard uncertainty multiplied by a coverage factor of $k = 2$, providing a level of confidence of approximately 95 %. Any Pass/Fail statements do not take into account the Measurement of Uncertainty. The Uncertainty budgets are stated for each Test method, these are for reference, and should be considered when results are close to Specification Limits / Requirements.
